**FICSA and UNICC team up to secure a brighter  
“Future of Work”**

**for UN staff**

**Joint Press Release by FICSA and UNICC**

**16/21**

**Geneva**

**25 March 2021**

---

**To: All members – Please share widely with your staff representatives and members**

From: Cosimo Melpignano – FICSA General Secretary

---

Dear colleagues,

We are pleased to share with you a joint [Press Release](#) between FICSA and the UN International Computing Center (UNICC) after signing a [Memorandum of Understanding](#).

Following the Joint Committee Session on Enabling Technology in preparation for the [74<sup>th</sup> FICSA Council](#), the FICSA membership has identified UNICC as a crucial partner to collaborate with FICSA on the ongoing and future digitalisation process, the digital divide and to ensure staff engagement.

We are convinced that the partnership will be mutually beneficial and a significant step towards our ability to deal with challenges and opportunities as set by the technological changes.

Key drivers of organizational shifts and innovations, digitalisation and Artificial Intelligence are transforming the way we work. It is now time to understand what staff can do to create the working environments they desire in a digitalized workplace.

Stay tuned on the next steps!
